This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

* To the figures here shown "Dynamite" to the value of £45,299, and "Horned Cattle (for Slaughter)" to that of £42,000—making a total of £87,299, which were accidentally omitted (*vide* footnotes on pages 17 and 18)—should be added to give the true total value of Imports for the year, which would thus be raised to £6,580,856. However, the original total of Imports -£6,493,557—having been widely published, it has been thought best to allow the figures to stand as they are, and to include the omitted values in the total value of Imports for 1897.

† Through a clerical error, the value of dynamite imported during 1896 (£45,299) was accidentally omitted when making up the Return of Imports for 1896. The amount will therefore be accounted for in the total amount of Imports for 1897. (*See* footnote on page 17.)

‡ £42,000 out of this amount was, through a clerical error, omitted from the total amount of Imports for 1896, and will therefore be accounted for in 1897 Returns. (*See* footnote marked * Erratum, on page 18.)

* The apparent falling off in 1896, as regards the heading "Orchards and Gardens," is explained by the fact that the acreages now separately specified under "Onions," "Other Root Crops," "Market Gardens," and "Miscellaneous Crops" were in previous years all included under the one heading.

† *It must also be pointed out that the acreages under "Vines" and "Fruit Trees" in 1896 have been compiled on the basis of the actual number of vines and fruit trees planted, according to a standard supplied by the Bureau of Agriculture, which allows 600 vines and 100 fruit trees to the acre; a comparison between the figures of 1896 and those of previous years is, therefore, valueless.*

"The Total Area under Crop" in 1896 was 111,738¾ acres, and if there be added to this 4,043½ acres under *permanent artificially sown grasses*, 24,945¼ acres *cleared and prepared for immediate use*, and 22,561¼ acres of land in *fallow*, the area of *arable land* at the end of the season will show a total of 163,288¼ acres.

* These are the Official Returns of Gold, exported from the Colony, which has been registered as required by law; no doubt, a considerable quantity has been exported without registration.

† Including West Pilbarra.

‡ The gold shown as alluvial for Coolgardie is an unspecified balance, probably due to several Fields of the Coolgardie group.

§ It will be seen that the gold exported from the Eastern Goldfields does not, in the above Table, agree with the Returns of Gold yielded from ore milled and alluvial and dollied gold, the reason for this being that previous to April 30th, 1896, the North Coolgardie, North-East Coolgardie, and East Coolgardie Gold Returns were included in the Coolgardie Return of Gold exported. It is evident also that some gold was declared at Coolgardie which was obtained on other Fields.
